

Astha Purohit

Associate Product Manager Candidate | User Behavior, Product Strategy, 0→1 Thinking

asthapurohit510@gmail.com · 9979856215 · Vadodara, Gujarat · asthapurohit.com · Substack: Astha Diaries

BTech graduate with product, engineering, and user research experience across enterprise software and 0→1 product concepts. Built and analyzed products through internships, independent projects, and the NextLeap PM Fellowship, with focus on user behavior, adoption, and metrics-driven product decisions.

INTERNSHIP & EXPERIENCE

Full Stack Developer Intern · Larsen & Toubro (L&T)

Jan – May 2024

- Contributed to end-to-end development of an issue-tracking product used across 5 projects by 50+ employees — from scoping requirements to shipping with a 4-member Agile team.
- Prioritized and shipped 8 core features with stakeholder input; improved issue handling speed and team coordination across engineering and operations.
- Introduced automated reminders and real-time status updates based on user feedback collected during deployment — reduced manual follow-up loops.
- Designed role-based access controls by mapping user personas and permission requirements before writing a line of code.

Placement Coordinator · Parul University

May 2023 – Mar 2024

- Managed placement operations for 200+ students across 5+ campus drives with 20+ companies — owned recruiter communication, scheduling, and student briefings end-to-end.
- Identified pipeline bottlenecks and introduced structured tracking process, reducing coordination overhead across 30+ stakeholders.

PROJECTS & PM WORK

Groww Weekly Review Pulse · NextLeap Fellowship

2026

- Identified workflow gap: PM teams receive hundreds of app reviews weekly with no scalable way to extract signal or assign action.
- Built an AI-powered dashboard scraping 1,499 real App Store + Play Store reviews, classifying into 5 themes (KYC, Payments, Withdrawals, Statements, UX) using Groq + Gemini.
- Generated weekly pulse: top 3 themes, 3 user quotes, 3 action ideas, and a ready-to-send team email — auto-refreshes every Monday via cron job, zero manual steps.
- Live at groww-weekly-pulse.vercel.app. Stack: React, Vite, Groq (LLaMA 3.3 70B), Gemini 1.5 Flash, Vercel.

HDFC MF FAQ Chatbot · NextLeap Fellowship

2026

- Built a RAG-powered chatbot making dense HDFC Mutual Fund documents conversational — live at hdfc-mf-faq.streamlit.app.
- Core insight: financial products fail users not because they're complex, but because the complexity is never translated. Stack: Python, Streamlit, LLM.

GeoBehaviour — 0→1 Product · Independent

2026 – Present

- Identified gap: small businesses in Indian urban markets lack reliable local demand signals — surveys capture intent, not behavior.
- Building a geo-analytics platform inferring consumer demand using proxy signals (foot traffic, search velocity, review patterns). Stack: Python, SQL, Maps API.

ChatGPT Voice Adoption — PRD · NextLeap Fellowship

2026

- Investigated ~11% habitual usage despite 95% awareness among Indian university students. Identified dual root cause: social friction in shared spaces + performance distrust for STEM terms.
- Designed Whisper Mode + Technical Trust Buffer. Success metrics: voice-to-query ratio 11%→25% in 90 days; L7 stickiness +15% WoW; WER <5% on technical terms.

Goodreads — PRD & Product Teardown · Independent

2026

- Diagnosed core loop failure: ~60% of users log progress after the fact — intent exists, the in-feed trigger is missing.
- Redesigned as Quick Log widget, reducing task flow from 7 steps to 2. North star: DAU logging +15% YoY; review conversion rate held flat as counter-metric.

ETL Pipeline with Delta Lake · Personal Project

Jan 2025

- Reduced processing time by 35% with Delta Lake optimisations, improving downstream reporting reliability. Stack: Databricks, Spark, AWS S3.

EDUCATION & TRAINING

PM Fellowship · NextLeap

2025 – Present

- PRD writing, user research, roadmap prioritisation, metrics definition, experiment design. Hands-on projects on real consumer products.

BTech — Computer Science & Engineering · Parul University (PIT Campus) Sep 2022 – Apr 2025

- CGPA: 7.89/10. Coursework: Data Structures, Algorithms, Software Engineering, Data Science.

SKILLS & METHODS

Product Methods: User Interviews · PRDs · Opportunity Sizing · RICE Prioritization · Funnel Analysis · Experiment Design · JTBD · Behavioral Economics

PM Tools: Notion · Figma · Miro · Jira · Google Analytics · Mixpanel

Technical: Python · SQL · RAG/LLM · React · Databricks · Spark · AWS · Git

Writing: Astha Diaries (Substack) — behavioral and cultural essays, 5+ published pieces.
