Astha Purohit

Aspiring AI Product Manager | NextLeap PM Fellow
asthapurohit510@gmail.com | +91 99798 56215 | Vadodara, Gujarat
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Engineer-turned-product manager who has shipped a **0-to-1 tool adopted across 5 projects** at L&T and launched **two live LLM powered products**. NextLeap PM Fellow skilled in **user research, PRDs, RICE prioritization, metrics definition, and experiment design**, turning user problems into measurable product outcomes.

EXPERIENCE

Full Stack Developer Intern, Larsen & Toubro (L&T) **Jan 2024 – May 2024**

- Shipped a **0-to-1 issue-tracking product** with a **4-person Agile team**, adopted for daily use across **5 projects** by **50+ engineering and operations users**.
- **Identified** email follow-ups as the core coordination pain point by observing team workflows; introduced **automated reminders and live status updates** that cut manual follow-up emails from **~40 to under 10 per week.**
- **Prioritized and shipped 8 core features** with stakeholders, sequencing first the capabilities that unblocked cross-team coordination.
- Mapped stakeholder access needs before development and designed **role-based permissions** around real user roles.

Placement Coordinator, Parul University **May 2023 – Mar 2024**

- Led placement operations for **200+ students** across **5+ campus drives** with **20+ recruiting companies**, owning recruiter communication, scheduling, and student briefings.
- Identified recurring pipeline bottlenecks and introduced a **tracking process** that cut turnaround from **3 days to same-day** across **30+ stakeholders**.

PROJECTS

Groww Weekly Review Pulse: AI Review-Insights Product | NextLeap Fellowship **2026**

- Identified the problem: PM teams receive hundreds of app reviews weekly with **no systematic way to turn feedback into decisions**.
- Designed an **LLM classification pipeline** (Groq LLaMA 3.3 70B, Gemini) that analyzed **1,499 App Store and Play Store reviews** into **5 product themes**: KYC, Payments, Withdrawals, Statements, UX.
- Automated a **zero-touch weekly pulse** emailed every Monday to recipients with the **top 3 themes, 3 user quotes, and 3 recommended actions**; launched in production on Vercel (React, Vite).
- Evaluated output quality against **50 hand-labeled reviews** (84**% theme-classification accuracy**) at **under 2 minutes per weekly run**.

HDFC Mutual Fund Self-Service Assistant | NextLeap Fellowship **2026**

- Framed the user problem: investors struggle not because funds are complex, but because **no one translates dense scheme documentation** into plain answers.
- Launched a **live conversational assistant** that lets everyday investors ask plain-language questions and get direct answers from HDFC Mutual Fund documents (Python, Streamlit, LLM).
- Built an **evaluation set of 30 real investor questions**: 26/30 **answered correctly**, with **source citations on every answer and refusals for out-of-scope or advice questions** to limit hallucinations.

ChatGPT Voice Adoption: PRD | NextLeap Fellowship **2026**

- Diagnosed an **awareness-to-usage gap** among Indian university students from a **survey of 42 students** (**95% aware** of voice, **~11% regular users**), tracing it to social awkwardness and low trust on technical terms.
- Proposed **Whisper Mode** and a **Technical Trust Buffer**; set target metrics: voice-to-query **11% to 25% in 90 days**, L7 stickiness +15% by day 90, technical-term error rate **under 5%**.

Goodreads: PRD & Product Teardown | Independent **2026**

- Identified the core-loop leak: **~60% of users log reading after the fact** (**4 of 6 user interviews**) because nothing in the feed prompts them in the moment.
- Proposed a **Quick Log widget**, cutting the flow from **7 steps to 2**; set a north-star target of **DAU logging +15% YoY** with review conversion as a counter-metric.

SKILLS & EXPERTISE

Product: User Interviews, User Research, PRDs, Roadmap Prioritization, RICE, Opportunity Sizing, Funnel Analysis, Metrics Definition, Experiment Design, JTBD
AI: LLM Product Integration, RAG, LLM-based Classification, Groq (LLaMA 3.3 70B), Gemini
Tools: Figma, Jira, Notion, Miro, Google Analytics, Mixpanel
Technical: Python, SQL, React, Git, Streamlit, Vercel
Writing: Astha Diaries (Substack), 5+ published essays on behavior and culture

EDUCATION

BTech, Computer Science & Engineering, Parul University (PIT) **Sep 2022 – Apr 2025**
CGPA 7.89/10 | Coursework: Data Structures, Algorithms, Software Engineering, Data Science
Product Management Fellowship, NextLeap (Completed, 13 weeks) **2026**
PRD writing, user research, roadmap prioritization, metrics definition, and experiment design through hands-on projects on real consumer products.
